

OUR LADY OF FATIMA UNIVERSITY
College of Computer Studies
Quezon City Campus

September 24, 2026

Good day!

In partial fulfillment of our requirements for Capstone Project, we, the students of Our Lady of Fatima University, Quezon City Campus, taking up Bachelor of Science in Information Technology, would like to respectfully request your coordination and assistance regarding our research study entitled **“Machine Learning-Based Poverty Prediction Using ARIMA-Forecasted Socioeconomic Indicators.”**

In connection with this, we would like to coordinate with your good office for data verification and system evaluation. Specifically, we seek your assistance in verifying the relevance and accuracy of the socioeconomic data and indicators used in our study, as well as evaluating the developed system in terms of its accuracy, usefulness, reliability, and interpretability.

Your participation and expert feedback will greatly contribute to the validation and improvement of our research system and will help ensure that the study is aligned with appropriate socioeconomic and poverty-related data practices.

Furthermore, we would like to identify your office as one of the intended beneficiaries of the developed system. The system is designed to provide poverty predictions and socioeconomic insights that may serve as supplementary information for poverty-related analysis, planning, and decision-making. Through your participation and expert feedback, we also hope to determine how the system may be made more relevant and useful to organizations involved in socioeconomic and poverty-related initiatives.

We sincerely hope for your kind consideration and support. Thank you for your time and assistance in contributing to the successful completion of our Capstone project.

Respectfully yours,

Researchers:

Alerta, Mark Christian D.

Andaya, Luster Jay P.

Oandasan, John Lloyd M.

Caduan, Renzo Jasper E.
